Planning & Design:

- Decide on pool type (inground vs. above-ground)
- Finalise layout, shape, and additional features (e.g., spa, waterfall)
- Budget for installation, decking, and safety features (fencing, covers)
- Obtain necessary permits and approvals

Site Preparation & Excavation:

- Excavate and level the site for pool installation
- Install plumbing and electrical systems for equipment
- Build pool shell (concrete, fibreglass, or vinyl)

Installation:

- Install coping, decking, and tiling (if applicable)
- Set up pool equipment (filter, pump, heater)
- Add safety features (fencing, covers, alarms)

Finishing Touches:

- Fill pool with water, balance chemicals, and test water quality
- Landscape around the pool (plant shrubs, lay stone borders)
- Install pool cleaning equipment and final decorative touches

Stand
No.
